A new perspective on waste

Revolutionize Your Waste

As an expert in delivering Waste-to-Energy solutions, Eco-Growth is committed to leaving a clean legacy. We partner with clients to create a world where all people can pursue opportunities without waste.

Eco-Growth's innovative technology transforms raw, organic waste into a useable, significantly lighter, odour-free substance that can be used as a biofuel, reducing the costs associated with commercial disposal of organic waste. Our Model 500 Organic Reactor (EGOR™) enables a new perspective on waste, allowing larger commercial and Government facilities to comply with new organics by-laws, improve business performance, and get the most out of their waste.
